

David VanLuven
Town Supervisor

George S. Kansas, P.E.
Commissioner of Public Works

TOWN OF BETHLEHEM

Albany County - New York
DEPARTMENT OF PUBLIC WORKS
445 DELAWARE AVENUE
DELMAR, NEW YORK 12054
(518) 439-4955 option 4
Fax: (518) 439-5808

Water Permit Application Process

Water Connection & Repair Permits

- Applications for connections or terminations to the Town water system must be made in writing on the Town water permit application form which is available on the Town website. Application forms must be submitted by the property owner or their authorized representative to DPW at least 30 days prior to the proposed connection/termination.
- For **Emergency repairs to existing water service lines**, please contact the water department for a repair permit. The water application form is required for emergency repairs to an existing water service. Insurance and inspection requirements for repairs are the same as listed for new water connections. Repair permits will be issued immediately.
- Any contractor or other party performing any work in connection with the construction of a water main or water service must be approved by the department, and said Contractor or other party must have on file with the Department an Owner's and Contractor's protective liability insurance policy naming the Town of Bethlehem and Water District Number 1 as additional insureds, in the following amounts:
 - Bodily injury - \$2,000,000.00 (Two Million) each incident
 - Property Damage - \$100,000.00 (One hundred thousand)

No permit will be issued without a current insurance certificate on file with the Town of Bethlehem Water Department.

- Once the application has been reviewed and approved by the Commissioner or Town Engineer, you will be notified that your permit is ready to be picked up.
- Payment for the permit is due when the permit is picked up.
- Work may commence **only** after the issuance of the permit.
- For new or modified construction, the water service permit must be issued prior to the issuance of the building permit.
- For Taps under 2", the service line must be run from the structure being served to the property line prior to the Town installing the tap and curb box. The Town will connect the homeowner's side to complete the water service connection.
- No tapping or water service installation will be done before April 1 or after November 1 unless specifically authorized in writing by the Department.
- The Department requires an inspection of all work performed before the trench is closed: if such trench is closed, the applicant, contractor and/or owner may be made to uncover the lines for inspection. Call the Department at (518) 439-4955 to schedule a water service line inspection. Inspections must be called in by 2:30PM.
- The permit fee includes one (1) inspection and one (1) meter installation appointment. If additional inspections or appointments are required, a service call fee for each will be added to the account.
