

Long Description for Bicycle and Pedestrian Priority Network Map

The Bicycle and Pedestrian Priority Network Map shows a map to the Town of Bethlehem and all the roads within the Town. Roads that are designated as preferable targets for bicycle and or pedestrian infrastructure are thicker and are colored boldly. The locations of hamlet areas, schools, religious entities, and parks or preserves also appear so that it is clear how priority routes connect residential neighborhoods to these different kinds of destinations. Existing sidewalks and crosswalks are shown with thinner lines on the map and appear on top of the priority network routes where there is currently overlap. Bicycle and pedestrian related signs, traffic stop lights, and bus stops are also shown, and these appear on top of the existing sidewalks and priority network routes where there is overlap.
