

Thursday, March 26, Town Hall, 6:30 p.m. – Findings Presentation

The GreenPlay consultants will present a summary of key findings from the inventory, needs assessments, and other analyses. This is the final opportunity for stakeholders and interested parties to raise any additional key issues to be considered as the process of recommendation development begins.

Following the Findings Presentation, the consultants will work with the Town's project team to fully analyze all key findings and create implementable recommendations to best meet Bethlehem's parks and recreation needs. This process will also consider operational feasibility, political or historical constraints, and any other potential challenges. The group will engage key stakeholders as necessary in determining the future vision and action plan steps
